Motivated and results-oriented Software Engineer with hands-on experience in various software development projects. Adapt at leveraging technical expertise to deliver robust, efficient and scalable solutions.

Education

B.Tech in Computer Science and Engineering

Nov 2021 – May 2025

- Government Engineering College, Idukki
- CGPA: 7.84

Experience

IBM SkillsBuild (Internship), Artificial Intelligence and Machine Learning

July 2024 - Aug 2024

- Gained understanding of key concepts in data driven problem solving.
- Improved problem solving skills in real world AI scenarios and understood the basics of natural language processing.

Technmagi (Internship), Cyber Security and Ethical Hacking

Aug 2023 - Sept 2023

- Learned basic cybersecurity concepts.
- Used Kali Linux and tools like Wireshark for hands-on tasks.

Projects

DROp: Dynamic Route Optimizer for last mile delivery

Dec 2024 – April 2025

- Developed a dynamic routing recommending system to solve inefficiencies in last mile delivery.
- The system enables dynamic scheduling based on customer preferences.
- Tools Used: Dart, Flutter

Vaayo: Carpooling App

Feb 2024 - May 2024

- Developed a hitch hiking modeled carpooling mobile app to solve common issues found in traditional transportation methods.
- Tools Used: Dart, Flutter

Technologies

Languages: C, Java, Python, Dart

Database: SQL, Firebase

Development Tools: Visual Studio Code

Frameworks and Libraries: Flutter(Dart)
